List of Tables

- 3.1 Balance of supply and demand
- 3.2 Summary of feasible resource options
- 4.1 Benefits of proposed scheme
- 4.2 Scoping table
- 6.1 General criteria for classifying the value or sensitivity of environmental resources or receptors
- 6.2 General criteria for classifying the magnitude and nature of environmental effects
- 6.3 Assessment of significance of environmental effects and residual effects
- 7.1 Treated water 2004/2005
- 7.2 Summary statistics for suspended sediment measurements for the survey period

- 8.1 Qualifying interest of Special Protection Area
- 8.2 Hampshire, Isle of Wight and UK BAP Priority Species
- 10.1 Change in view at principal receptors during construction works (Hampshire)
- 10.2 Change in view at principal receptors during construction works (Isle of Wight)
- 12.1 Predicted tide levels at Lepe and Cowes
- 13.1 Estimated background pollutant emissions
- 14.1 Impact scale for comparison of future noise against existing noise
- 14.2 Transient vibration guide values for cosmetic damage
- 14.3 Noise monitoring receptors
- 14.4 Summary of measured ambient noise levels, dB
- 14.5 Predicted construction noise levels, façade LAeq 12 hours dB(A) – Lepe
- 14.6 Change in ambient noise levels due to construction, dB(A) – Lepe
- 14.7 Predicted construction noise levels, façade LAeq 12 hours dB(A) – Gurnard
- 14.8 Change in ambient noise levels due to construction, dB(A) – Gurnard
- 16.1 Estimated traffic numbers and movements during the pipeline replacement scheme (Hampshire)
- 16.2 Estimated traffic numbers and movements during the pipeline replacement scheme (isle of Wight)
- 20.1 Summary of environmental effects
