General overview and business update

This Investor Report is updated for the year ended 31 March 2015. The Investor Report is a requirement of the Common Terms Agreement (CTA), which governs the company's obligations to its lenders and investors.

Projected financial ratios are published for the current PR14 / AMP6 period from April 2015 to March 2020, and include additional interest cover ratios to maintain the effectiveness of financial ratios following regulatory building block changes for AMP6. Actual financial ratios for March 2015 continue to be based upon the AMP5 regulatory building blocks methodology.

General levels of service

Customer

The Service Incentive Mechanism (SIM), comprises two measures, a quantitative measure reflecting the number and type of "unwanted" contact from customers and a qualitative measure of customer satisfaction. These measures are combined into a score out of 100.

The method of calculating the SIM score changed during the 2014-15 financial year, from a measure comprising 50% quantitative and 50% qualitative, to a measure comprising 25% quantitative and 75% qualitative. The qualitative assessment also changed from a customer satisfaction assessment of resolved queries to a customer satisfaction assessment of both resolved and unresolved queries. For 2014-15, we have reported on the old basis to aid comparison with previous years of this AMP5 period.

The SIM score for the financial year 2014-15 was 79 (out of 100), an improvement of 5% on the score of 75 for 2013-14.

	31 Mar 2011	31 Mar 2012	31 Mar 2013	31 Mar 2014	31 Mar 2015
SIM score	54	65	62	75	79

Health & Safety

For the 16th consecutive year, we achieved the Royal Society for the Prevention of Accidents (RoSPA) gold level award and were once again presented with an Order of Distinction, the first water company to receive such an accolade twice.

Operational performance

	2014–15		2013–14
	Target	Achieved	Achieved
Overall drinking water quality	99.97%	99.97%	99.94%
Security of Supply index	100	100	100
Leakage (million litres of water per day)	88	82	85
Water non-infrastructure	Stable	Stable	Stable
Water infrastructure	Stable	Stable	Stable
Wastewater infrastructure	Stable	Stable	Deteriorating
Wastewater non-infrastructure	Stable	Stable	Deteriorating
All pollution incidents (wastewater), Category 1-3	267	292	320
Serious pollution incidents (wastewater), Category 1-2	7	12	9
Environmental discharge permit compliance	98.6%	99.0%	95.9%
Greenhouse gas emissions - ktCO ₂ e	386	281	293

We continued to supply drinking water of the highest quality to more than two million people. Our drinking water quality performance of 99.97% is among the best levels of compliance in the industry.

Our universal metering programme entered its final stages and has surpassed our original expectations for improvement in water efficiency. This has helped us to manage the demand on water abstraction from population growth in our region, and water abstraction levels are at a similar level to the early 1970's.

We continue to lead the UK water sector on leakage control, working around the clock to find and repair leaks on our 14,000 kilometre network of water mains.

For 2014-15 we achieved a Stable serviceability assessment across all four of our services. For 2013-14 we also assessed all services as Stable, but Ofwat took a different view regarding wastewater serviceability, which we have reflected in the table.

Despite many parts of our region having high groundwater levels for the third year running, there was significantly less impact on our customers and continued improvement in our wastewater network performance as a result of our carefully targeted maintenance programme.

For wastewater treatment, we achieved 99 per cent compliance with environmental standards, our best performance for 15 years despite feeling the effects of the wettest winter on record at the start of the year.

In 2014, every beach in our region once again met European Standards for bathing water quality.

Financial performance for year end 31 March 2015

Years ended 31 March	2015 £m	2014 £m	Change %
Turnover	828.6	806.2	2.8
Operating costs	-245.5	-246.5	-0.4
Other income	0.2	0.2	
EBITDA	583.3	559.9	4.2
Depreciation & disposals	-256.1	-234.4	
Exceptional item	2.4	-18.8	
Net interest	-125.7	-167.2	
Profit before tax	203.9	139.5	46.2
Tax	-36.7	30.3	
Profit after tax	167.2	169.8	-1.5

Turnover increased by 2.8 per cent to £828.6 million (2013-14: £806.2 million) principally as a result of the average tariff increase on metered and unmetered income of 2.5 per cent.

Operating costs decreased by 0.4%, to £245.5 million, as a result of savings from process improvements, contract renegotiations and power efficiencies, more than offsetting cost pressures from inflation, costs of operating new sites, and an increase to the bad debt provision.

Net cash inflow from Operating activities improved to £544.4 million (2013-14: £543.3m), despite payments made during the year related to the exceptional flooding costs accrued at 31 March 2014.

Net capital expenditure in the year resulted in a net cash outflow of £336.0 million (2013-14: £371.8 million). This decrease in expenditure reflects the natural profile of capital expenditure tailing off as we come to the end of our five year programme.

Interest expense reduced to £125.7 million in the year (2013-14: £167.2 million) as a result of lower RPI during the year, leading to a reduction of accrued accretion for the year of £48.5m (2013-14 £72.1 million), and a reduction in interest payable following the repayment of the 7.869% £250 million Class B bond on 31 March 2014.

Financing

In August 2014 we extended the term of the £150m Class B loan facility from 2017 to 2021, and reduced the margin from 3.0% to 1.95%.

In November 2014 we renewed our liquidity facilities for the AMP6 period, and refreshed the core relationship bank group:

- The £200m RCF (Revolving Credit Facility) due June 2015, has been increased to £350m and extended to November 2019 (plus 2 years extension options)
- The £140m DSRLF (Debt Service Reserve Liquidity Facility) has been increased to £170m
- An O&MF (Operating & Maintenance Facility) of £45m has been added

In July 2015 we completed a £100 million Index Linked loan facility with the European Investment Bank. We anticipate drawing from the facility during 2015.

Our Account Bank, and Standstill Cash Manager, is the National Westminster Bank which no longer meets the minimum credit rating requirement specified in the CTA. We have secured a STID waiver that permits us to continue to use National Westminster Bank as our Account Bank and Standstill Cash Manager until 26 August 2015, so that we can manage a transfer of Account Bank. Given changes to bank credit ratings during this period will likely seek an extension to this period to enable us to change Account Bank in an orderly way.

Credit rating	
Standard & Poor's	Class A debt: A- Class B debt: BBB
Fitch	Class A debt: A- Class B debt: BBB
Moody's	Class A debt: Baa1 Class B debt: Ba1

All credit ratings have a Stable outlook, following Moody's stabilisation of the outlook, from negative outlook, in February 2015.

Dividend and Financing Policy

Southern Water aims to deliver a sustainable long-term financial strategy, taking into account the interests of all stakeholders. Our shareholders are long-term investors and fully support the strategy adopted.

We do not plan any significant deviation from the current level of around 80% senior gearing in AMP6.

Southern Water's dividend policy is to propose dividends having given due consideration to the following financial and performance criteria.

1. Assessment of headroom under debt covenants
2. Assessment of the impact on the company's credit rating
3. Assessment of the liquidity position and ability to fulfil licence conditions
4. Assessment of key areas of business risk
5. Assessment of current year and cumulative distributable reserves
6. Directors' duties under law and Ofwat administered regulatory arrangements

Southern Water's dividend policy and the associated financial and performance criteria are intended to support the credit ratings of the business and ensure continued access to diversified sources of finance.

We do not intend to access future index-linked debt through derivatives but will instead seek such debt from "natural" sources such as public and private bond markets.

From a Treasury management perspective, we will include accretion on PAYG swaps in our maturity buckets for CTA testing.

The shareholders continue to support the business and no dividends were paid in the period to the shareholders of our ultimate parent company, Greensands Holdings Limited.

Board membership (of Southern Water Services Ltd) as at 31 March 2015

Robert Jennings (Chairman)

Matthew Wright (Chief Executive Officer)

Michael Carmedy (Chief Financial Officer)

Bronte Somes (Non-executive Director)

Mark Walters (Non-executive Director)

Bill Tame (Independent Non-executive Director)

Rosemary Boot (Independent Non-executive Director)

David Golden (Independent Non-executive Director)

Paul Sheffield (Independent Non-executive Director)

Ultimate parent company

The ultimate parent company is Greensands Holdings Ltd.

Financial ratios

As required by the CTA, financial ratios are reported up to the end of the current five year regulatory period. In all cases, financial ratios are within the 'trigger levels' as defined in the CTA. The forecasts used to generate the financial ratios are derived from the SWS Business Financial Model and are in the format specified by the CTA.

New interest cover ratios have been included (page 17) as a result of regulatory and accounting changes for the PR14 / AMP6 period, for financial years 2016 to 2020. The change to the form of the new ratios is to replace CCD/IRC with RCV run down rate, and to define both measures as 'depreciation'. Analysis has also been included to further explain the changes.

Regulatory changes for the PR14 period include the removal of CCD (Current Cost Depreciation) and IRC (Infrastructure Renewals Charge) as regulatory building blocks used to determine prices for the next regulatory period. These measures of the depreciation of RCV are included within the original covenanted financial ratios. A total expenditure assessment has also been introduced ('Totex'), with a recovery of 'fast money' through revenues, and 'slow money' added to the RCV.

We have introduced additional interest cover ratios to ensure the effectiveness of the original intended purpose of the covenanted financial ratios:

- CCD will be replaced with the RCV run-down rate. This is a directly comparable measure for the depreciation of the RCV.
- We will be adopting IFRS from 2015-16, and infrastructure renewals accounting is not permissible under IFRS. As a consequence, IRC will no longer exist for accounting purposes and has been removed as a regulatory building block for PR14 / AMP6. Infrastructure renewals expenditure will form an integral part of our operating and capital expenditure, and no longer 'smoothed' as IRC.
- For the AMP6 regulatory period, 'fast money' is recovered through customer charges, whereas previously, operating costs were recovered through customer charges. We have maintained a strong correlation between fast money and the previous ratio measure of operating costs. The balance of slow money is added to the RCV in line with the previous measure of capital expenditure being added to the RCV. A reconciliation between these measures has been included in page 18 of this report, and will continue to form part of the investor report and compliance certificate.

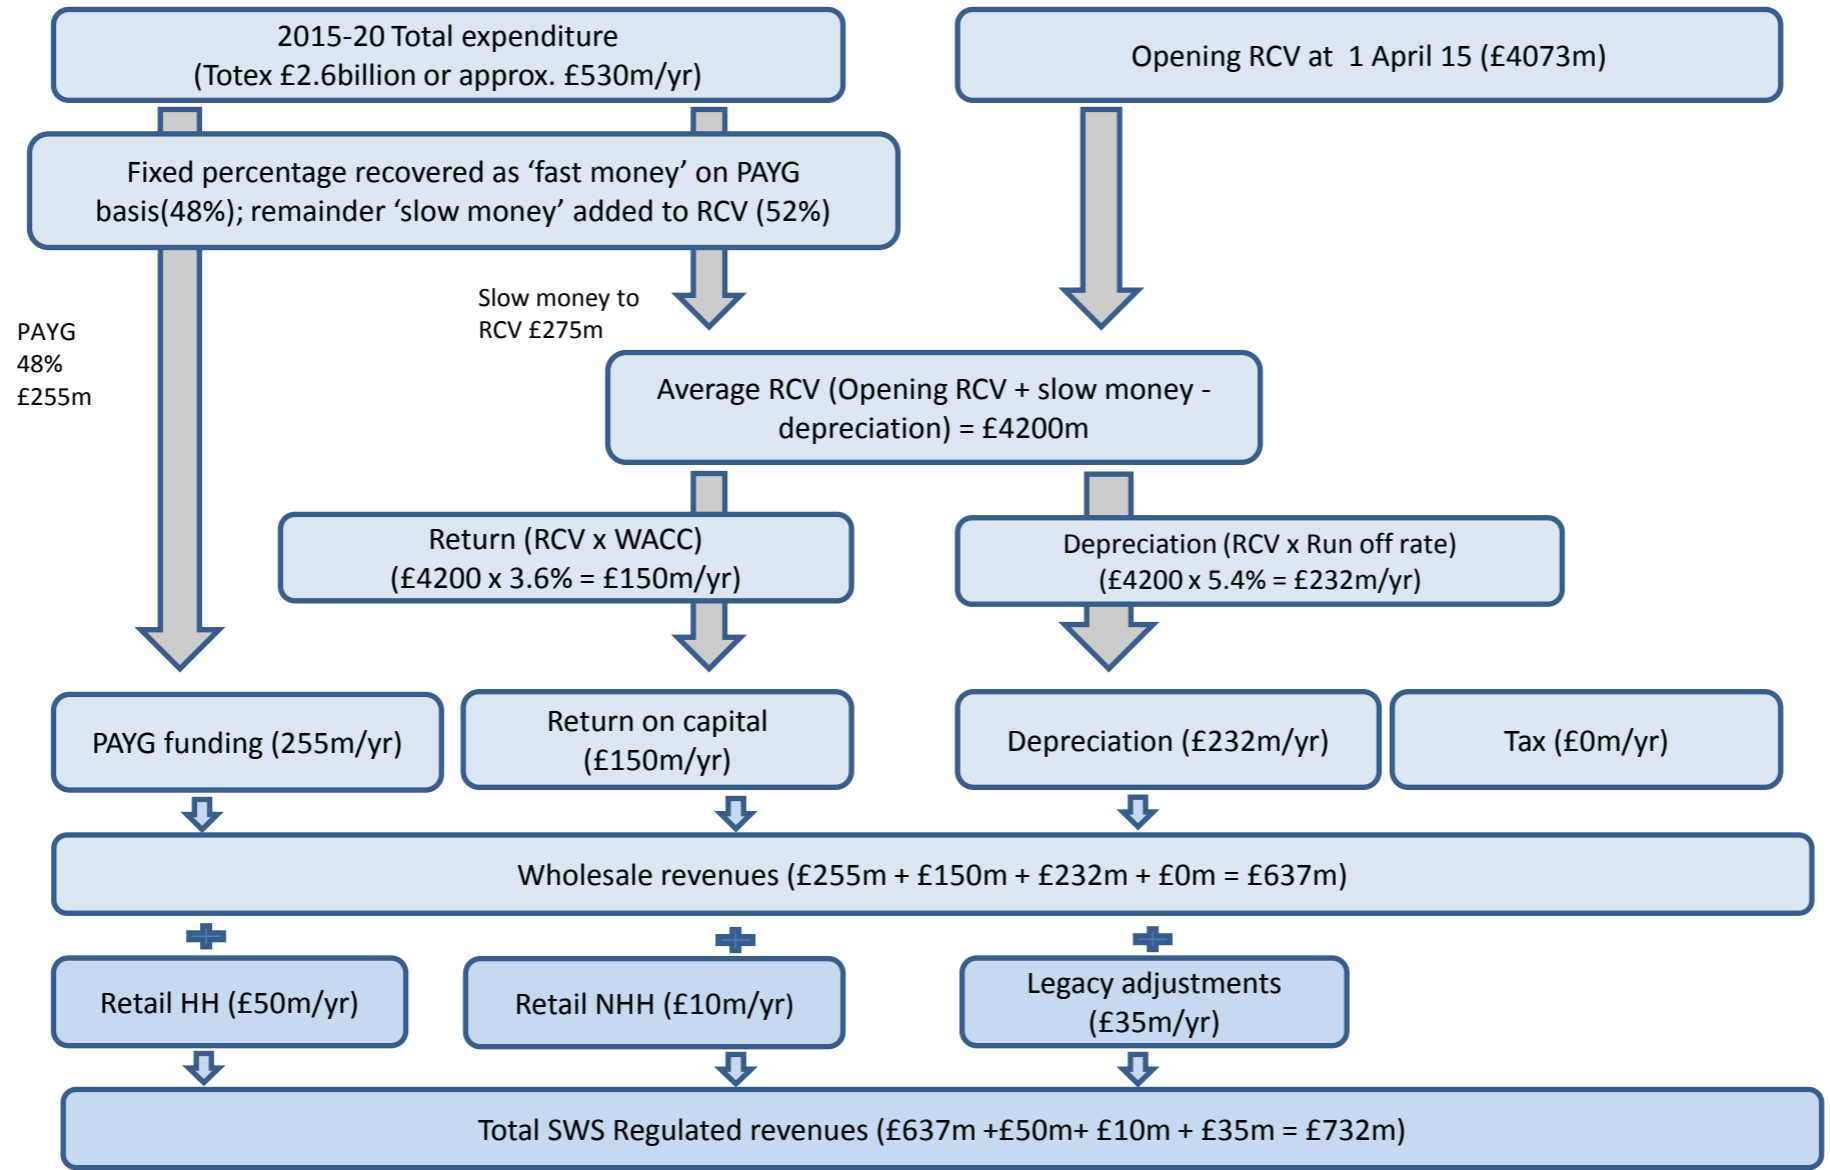

The following, Pages 10 and 11 of this report provide an overview of the regulatory building blocks for PR14, the foundation for the structure of debt covenant ratios. Pages 18 and 19 provide a comparison of the PR14 totex with the forecast level of operating and capital expenditure, and a reconciliation to the net operating cash flow input to the interest cover ratios

Short term forecast RPI's used for this Investor Report are calculated as the average of inflation forecasts published by a number of UK banks. RPI at March 2015 was 0.90%, the forecast RPI used at March 2016 is 2.36%, and 2.90% has been used for each subsequent year to March 2020.

For investor reporting, interest paid is reported on an accruals basis in line with the requirements of the CTA.

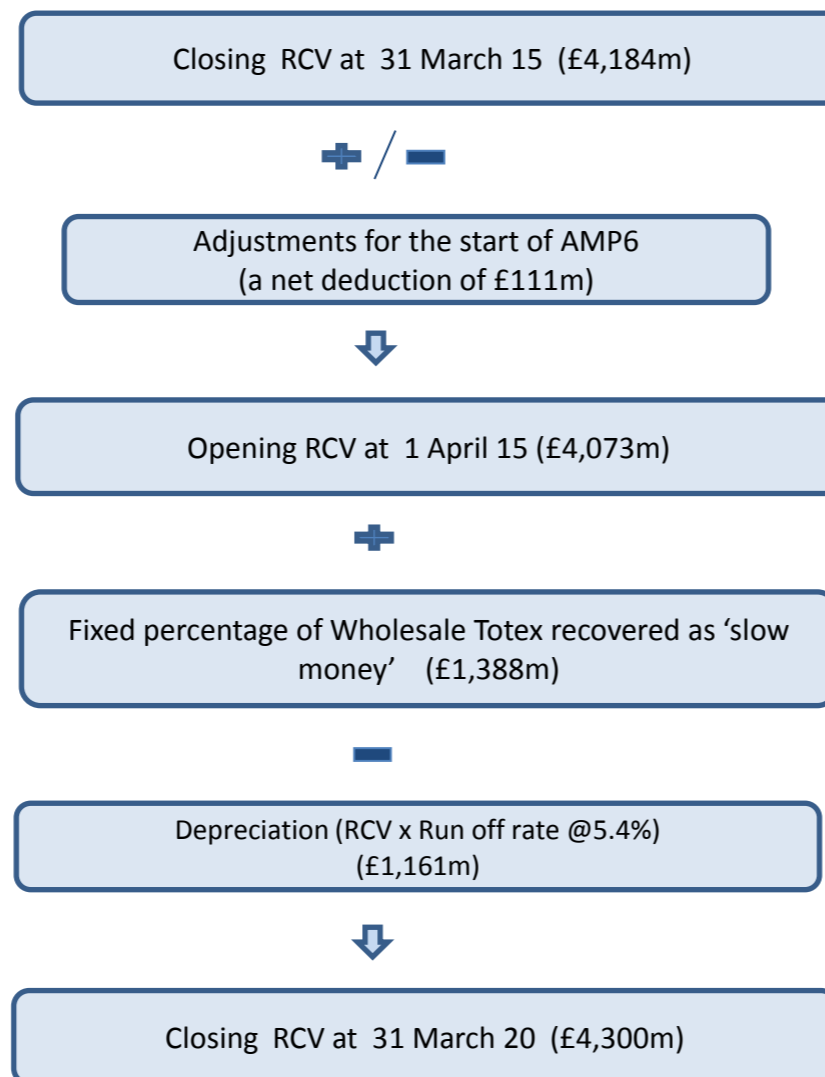

Projected payments on subordinated debt and distributions comprise ordinary dividends, preference share dividends, and group relief tax payments.

An illustration of the Totex approach to cost recovery for AMP6 (the 'revenue building blocks'). 2012/13 prices

Note: Values stated are rounded average annual values used to illustrate the totex approach to cost recovery, rather than determined annual values

CCD (Current Cost Depreciation) and IRC (Infrastructure Renewals Contribution) have been removed as regulatory building blocks for the regulatory period 2016 to 2020. As a consequence, the values for this input into interest cover ratios is zero for these years.

Additional interest cover ratios have been introduced (following page) that maintain consistency of ratio performance with previous periods.

Further explanation of this change can be found on page 9 of this report.

	Historic: (B-G+F)/D		N/A	1.0	3.2	N/A	N/A	N/A	N/A

These new interest cover ratios include both, CCD & IRC (2015), and RCV run down rate (2016 to 2020), as depreciation of the RCV .

The effect of the reclassification of Infrastructure Renewals expenditure is illustrated by, amongst other changes from 2015 to 2016, a reduction in net income from expenditure included in operating costs and a reduction in RCV depreciation from the expenditure no longer added to the RCV.

Comparison of FD PAYG funding ('fast money') to actual operating costs

PR14 Final Determination:

		Period from 2016 to 2020 £m
Totex funding	2012/13 prices	2,639.4
Totex funding	Outturn	<u>2,966.4</u>
PAYG fast money	Outturn	1,407.7
Slow money	Outturn	1,558.6
Retail operating costs	FD	<u>294.9</u>
Total		<u>3,261.3</u>
Total Appointed expenditure (treating Retail Opex as Fast money)		
Fast money		52.2%
Slow Money		47.8%

Wholesale operating costs and capital expenditure for the regulatory period (excluding pension deficit contributions outside of the Totex assessment)

The value of Wholesale Totex recovered via revenues

The value of Wholesale Totex added to the RCV

Operating costs for the Retail price control per Final Determination

Comparison to actual operating costs

		Period from 2016 to 2020 £m
Operating costs per accounts	Outturn	1,645.7
Capital expenditure per accounts	Outturn	1,541.4
Total Appointed expenditure	Outturn	<u>3,187.1</u>

Comparison of FD with actual costs

		Actual	FD
Total Appointed expenditure	Outturn	3,187.1	3,261.3

Actual expenditure is forecast to be £74.2m less than the FD

		Actual (%)	FD (%)
Operating costs / Fast money		51.6%	52.2%
Capital expenditure / Slow Money		48.4%	47.8%

There is a 0.6% (£18.2m) variance over the regulatory period between FD and actual forecast apportionment of costs between operating costs / capital expenditure and fast / slow money

PAYG funding and actual costs

The PR14 Final Determination has determined the proportion of AMP6 Totex Wholesale expenditure recovered via revenues and the proportion of AMP6 Totex Wholesale expenditure added to the RCV.

The PR14 Final Determination has also determined how any variance between actual Totex Wholesale expenditure and PR14 Totex Wholesale expenditure is 'trued' for the next AMP7 regulatory period:

We anticipate that 26% of Wholesale Totex variance will be deducted/added to Wholesale revenues in AMP7

We anticipate that 24% of Wholesale Totex variance will be deducted/added to the RCV for the start of AMP7.

The remaining 50% of Wholesale Totex variance will be retained/borne by the company.

As a guide, based upon the actual forecast efficiency against the PR14 FD of £74.2m, the indicative adjustment to opening RCV for AMP7 would be a reduction of approximately £18m.

Reconciliation to Net Appointed Income

	31 Mar 2015 £m	31 Mar 2016 £m	31 Mar 2017 £m	31 Mar 2018 £m	31 Mar 2019 £m	31 Mar 2020 £m	Total 2016 to 2020 £m
Operating costs per accounts	241.5	326.1	327.4	324.5	330.7	337.0	1,645.7
Movement in working capital and pension deficit contribution	13.6	14.7	2.5	7.3	3.6	4.7	
Appointed operating cost cash flow (ref 3. page 10)	255.1	340.8	329.9	331.8	334.3	341.7	

Declaration

We confirm that each of the above Ratios has been calculated in respect of each of the relevant periods for which it is required under the Common Terms Agreement and has not breached the Trigger Event Ratio Levels and has not caused Paragraph 20 (Ratios) of Part 2 (Event of Default (SWS and the Issuer)) of Schedule 7 of the Common Terms Agreement to be breached.

We confirm that the Annual Finance Charge is £133.4 million for 2015/16 equating to a Monthly Payment Amount for this period of £11.3 million.

We also confirm that no Default or Potential Trigger Event is outstanding and that SWS's insurances are being maintained in accordance with the Common Terms Agreement.
