NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2012

1 Accounting policies

Basis of accounting

These financial statements are prepared on the going concern basis, under the historical cost convention, and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom. The principal accounting policies, which have been applied consistently throughout the period, are set out below.

The directors believe that preparing the accounts on the going concern basis is appropriate due to the continued financial support of the ultimate parent company Greensands Holdings Limited. The directors have received confirmation that Greensands Holdings Limited intends to support the Company for at least one year after these financial statements are signed.

Cash flow statement

The Company is a wholly owned subsidiary company of a group headed by Greensands Holdings Limited, and is included in the consolidated accounts of that company, which are publicly available. Consequently, the Company has taken advantage of the exemption within FRS 1 'Cash flow statements (revised 1996)' from preparing a cash flow statement.

Related party disclosure

The Company has taken advantage of the exemption under paragraph 3(c) from the provisions of FRS 8, 'Related party disclosures', on the grounds that it is a wholly owned subsidiary of a group headed by Greensands Holdings Limited, whose accounts are publicly available from the address given in note 16.

Taxation

The taxation charge in the profit and loss account is based on the profit or loss for the period as adjusted for disallowable and non-taxable items using current rates and takes into account tax deferred because of timing differences between the treatment of certain items for taxation and accounting purposes.

Deferred taxation is provided on all timing differences that have originated but not reversed by the balance sheet date, calculated at the rate at which it is expected the tax will arise in accordance with Financial Reporting Standard 19 'Deferred Tax' ('FRS 19'). Deferred taxation balances are not discounted. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered.

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2012 (continued)

1 Accounting policies (continued)

Financial instruments

The Company has adopted the provisions of FRS 25, 'Financial Instruments: Disclosure and Presentation', and FRS 26, 'Financial Instruments: Recognition and Measurement'.

Loans and receivables and other financial liabilities are initially measured at fair value, plus directly attributable issue costs. After initial measurement they are measured at amortised cost using the effective interest rate method and not revalued. Amortised cost is calculated taking into account any issue costs and any discount or premium on settlement. Interest costs are expensed in the profit and loss account as incurred.

The Company uses derivative financial instruments in the form of interest rate swaps to hedge its risks associated with interest rate fluctuations. The Company does not elect hedge accounting. Derivative financial instruments are recognised initially and subsequently in the balance sheet at fair value with any movements during the year charged or credited to the profit and loss account. The fair value is determined by reference to market values for similar instruments.

At each reporting date an assessment is carried out to determine whether there is any indication that financial assets may be impaired. Where there is objective evidence that an impairment loss has arisen, the carrying amount is reduced in accordance with FRS 26 'Financial Instruments: Measurement', with the loss being recognised in the profit and loss account in the year in which the respective assessment takes place

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2012 (continued)

2 Employee information

The services of the directors are deemed to be wholly attributable to their services to Greensands Holdings Limited.

The directors received no emoluments during the period in respect of their services to the Company.

Current tax:	
UK corporation tax on profit for the period	-
Deferred tax:	
Origination and reversal of timing differences	-
Total tax on profit/(loss) on ordinary activities	<u><u>-</u></u>

The rate of current tax charge on profit on ordinary activities varied from the standard rate of corporation tax due to the following factors:

	Period ended 31 March 2012 £m
Current tax	
Profit on ordinary activities before tax	<u>-</u>
Current tax	
UK corporation tax rate at standard rate of tax of 26% on profit for the period	-
Other short term timing differences	-
Current tax charge for period	<u><u>-</u></u>

Factors that may affect future tax charges:

On 21 March 2012 the UK Government announced a reduction in the main rate of corporation tax from 26% to 24% effective from 1 April 2012.

The Government has also indicated that it intends to enact future reductions in the main tax rate of 1% each year down to 22% by 1 April 2014. The future main tax rate reductions are expected to have a similar impact on the financial statements as outlined above albeit at a rate of reduction of 1% rather than 2%, however the actual impact will be dependent on the Company's deferred tax position, if any, at that time.

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2012 (continued)**11 Financial instruments****(i) Financial risk management objectives and policies**

The principal financial risks to which the Company is exposed are interest rate and liquidity risks. The Board has approved policies for the management of these risks.

Interest rate risk

The Company's interest rate risk is primarily in relation to its fixed rate borrowings (fair value risk) and floating rate borrowings (cash flow risk). Interest rate derivatives are used to manage the overall interest rate profile within the Company policy, which is to maintain a higher proportion of net debt at fixed rates of interest having regard to the prevailing interest rate outlook.

Liquidity risk

The Company raises additional funds, as required, to ensure that it has sufficient cash and/or facilities to fund the business of the Southern Water group for the next twelve months.

Currency risk

The Company raises currency rate swaps where necessary which fix the exchange rates reducing the risk of currency losses due to adverse fluctuations in exchange rates. The Company does not currently have any currency risk.

Sensitivity analysis

The principal market risks are movements in interest rates. Interest rates are currently either fixed or fully effective swap instruments are in place to swap floating rates for fixed.

(ii) Fair values of derivative financial instruments

The fair values of derivative financial instruments at the balance sheet date were:

	2012	
	Assets	Liabilities
	£m	£m
Interest rate swap	<u>8.7</u>	<u>(8.7)</u>

In relation to the swap detailed in note 10, cash receipts under the swap will continue over the term of the instrument. The interest swap contract will affect the profit and loss account throughout the period of the instrument.

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2012 (continued)**11 Financial instruments (continued)****(iii) Fair values of non derivative financial assets and financial liabilities**

Fair value is the amount at which a financial instrument could be exchanged in an arm's length transaction between informed and willing parties. Where available, market values have been used to determine fair values.

	Book amount	Fair value
	2012	2012
	£m	£m
Long term borrowings	445.6	440.0
Long term debtors	445.6	440.0

(iv) Interest rate risk

In respect of income earning financial assets and interest bearing financial liabilities, the following tables indicate their effective interest.

Weighted average effective interest rates by class

	Loans & Receivables	Financial Liabilities
	2012	2012
	%	%

(v) Maturity of financial liabilities

The maturity profile of the Company's financial liabilities at 31 March 2012 is disclosed within note 10.

(vi) Fair value measurements recognised in the balance sheet

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;

- Level 3 fair value measurements are those derived from calculation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).
