How to use this guide

Please begin by reading **Section 1**, and then go:

- to **Section 2** if your water supply is metered and you are paying the Changeover Tariff, or
- to **Section 3** if your water supply is not metered and you are paying the Changeover Tariff

Section 4 gives details of other kinds of special help available if you meet certain conditions.

Section 5 tells you about paying your bill.

Section 6 tells you about how we may use your personal information.

Section 7 tells you about water meters, what to do if you are moving home, want to apply for a surface water drainage rebate, make a complaint, and what happens if you enter into any formal insolvency procedure.

Section 8 sets out our schedule of charges for 2019–20

Section 9 tells you how to contact us.

Please note that this booklet is not a legal document and does not take the place of our formal metering programme charges scheme. The intention of the booklet is to provide you with a summary of the key elements of our metering programme charges scheme. Please contact us if you would like a copy of this document.

Southern Water is an appointed provider of water supply and sewerage services in Hampshire, Isle of Wight, Sussex and Kent.

The services we provide are governed by the Water Industry Act 1991, which requires us to set out in a formal document called a 'Charges Scheme' how we will raise charges for those services.

The Secretary of State has determined the whole of our water supply area to be an area of serious water stress. By virtue of regulations made under the Water Industry Act 1999, this provides us with legal powers to install water meters for charging purposes.

Between 2010 and 2015 we carried out a metering programme, on an area-by-area basis. Under our metering programme, household properties in our water supply areas were metered for charging purposes. Meters fitted under our metering programme were fitted free of charge.

We developed a special tariff for customers metered under our metering programme, in order to help them make the change to metered charges. This tariff is known as the Changeover Tariff. The information in this booklet only applies to customers paying the Changeover Tariff.

The map on page 20 shows Southern Water's area of operation. If you receive your water supply from Southern Water but are not paying the Changeover Tariff, then please see our booklet **Southern Water charges 2019–20: A guide for household customers**.

Please note that if you receive either your water supply or sewerage service from another company, you will need to contact them for details of how they charge for their service. Our charges are reviewed each year and the amounts shown in this booklet relate only to the year starting 1 April 2019.

If you are unsure about anything contained in this booklet or would like more information, please contact our Customer Services Centre. Details on how to contact us can be found at the end of this booklet.

Section 1: General principles

Installing meters under our metering programme

We have installed meters for nearly 90% of our water supply customers under our metering programme

However, for the remaining customers, we have not been able to install a meter under our metering programme. This is because the water supply arrangements to some properties are complicated, and it is not possible for us to meter all the water supplied at reasonable cost.

Typically, we were able to install a meter under our metering programme where:

- only a single meter was required to record all the water supplied to the property;
- the meter could be located in our preferred location, which is normally in the public highway footpath at the location of the external stoptap; and
- the cost of reinstatement was reasonable.

The circumstances in which we were unable to install a meter under our metering programme include:

- the cost of separating the customer's water supply pipe where it is shared with other customers;
- the cost of installing additional meters if the customer's home is served by more than one supply or an additional shared supply;
- the cost of alterations to existing plumbing to enable a meter to be installed; and
- the cost of installing a meter in a location that is not our preferred location.

Where a meter has been installed under our metering programme

If your water supply has been metered under our metering programme you will have been switched from paying unmetered charges to paying metered charges, which are linked to the amount of water you use. If you receive sewerage services from us, your sewerage charges will also be metered charges.

Once a meter has been fitted, metered charges will always be payable.

Where a meter is not installed under our metering programme

If we have been unable to meter the water supply to your home under our metering programme for the reasons set out earlier in this section, you will have been switched from paying unmetered charges to paying assessed charges, which are based on the number of bedrooms in your home or on single occupancy. If you receive sewerage services from us, your sewerage charges will also be assessed charges.

Once this switch has taken place assessed charges will always be payable, unless circumstances should change at a later date which allow us to meter your water supply. In these circumstances, your charges will switch from assessed charges to metered charges following the installation of the meter.

No Access Charge

Although our main meter installation programme has now been completed, we will continue to install meters for charging purposes where circumstances allow. If you haven't had a meter installed yet, it may be because we need access to your property in order to progress the installation of your meter,

In these circumstances, we will ask you to agree an appointment with us. We will make extensive effort to make contact with you, and will be flexible when arranging appointments. However, if despite our efforts we are unable to obtain your co-operation to progress the installation of a meter, we will switch you from unmetered charges to our No Access charge with effect from the date on which we planned to install your meter.

The No Access charge is a fixed annual charge, and comprises separate rates for the water supply service and the sewerage service. Therefore, if we place you on the No Access charge you do not have the option of the single occupier discount, or the financial assistance provided by the Changeover Tariff. This means that you may well pay more for your water services than if charged on a metered basis.

If we have placed you on the No Access charge but you later assist us with the metering process, and we are able to install a meter, we will cancel the No Access Charge and switch you to metered charges with effect from the original planned meter installation date. Your metered charges will then be backdated for the period up to the actual meter installation date based on a check meter reading.

If we are unable to install a meter, we will switch you to assessed charges with effect from the original planned installation date, based on the number of bedrooms in your home or, where appropriate, on single occupancy. In either circumstance, you will be entitled to the assistance provided by the Changeover Tariff.

If you move into a property at which the former customer was paying the No Access charge, we will contact you to progress the installation of a meter.

Where we are able to install a meter, we will place you on metered charges with effect from the date that you occupied the property. Your charges for the period up to the actual meter installation date will be estimated based on a check meter reading.

Where you assist us with access to your new property, but we are unable to install a meter, we will place you on assessed charges with effect from the date that you occupied the property, based on the number of bedrooms in your home or, where appropriate, on single occupancy.

In either circumstance, you will be entitled to the assistance provided by the Changeover Tariff. If, however, you do not assist us with access to your new property, you will be placed on the No Access charge with effect from the date that you occupied the property.

Single occupier charge

If you pay assessed charges and you live alone you may apply to pay the single occupier charge. If you apply for this charge you must provide evidence of single occupancy; for example a copy of your current Council Tax bill containing a single occupier discount.

You will need to provide evidence of single occupancy each year if you wish to continue to take advantage of the charge. We will contact you at the appropriate time to remind you.

You must notify us promptly if your circumstances change and you no longer live alone. In these circumstances, your assessed charges will be based on the number of bedrooms in your home with effect from the day after the change in occupancy occurs.

The Changeover Tariff

As mentioned in the Introduction, we have put in place the Changeover Tariff in order to help customers make the change to metered charges.

This tariff is aimed at assisting those customers facing a bill increase as a result of moving from unmetered to metered charges. It is also available to customers moving from unmetered to assessed charges.

If you wish to take advantage of our Changeover Tariff you must contact us to let us know.

Customers who will benefit from lower bills as a result of the switch to metered charges can move directly to paying our normal metered tariff following the installation of their meter.

Similarly, customers who will benefit from lower bills as a result of the switch to assessed charges can move directly to paying our normal assessed charges.

Customers paying our normal metered tariff or normal assessed charges should see our booklet **Southern Water charges 2019–20: A guide for household customers**.

Unoccupied property

Generally, our charges may remain payable if a property is unoccupied, unless the water supply has been disconnected because it is unoccupied. Where the water supply to a property is disconnected for this reason, our charges remain payable to the day before the water supply is disconnected.

However, we will not make charges where a property is unoccupied for any continuous period of four weeks or more due to exceptional circumstances, such as death or the long-term hospitalisation of the customer. For the sake of clarity, charges would remain properly due and payable where the customer is not the sole occupier of the property.

We will make the adjustment to charges once we are satisfied that the property is likely to remain unoccupied for a continuous period of four weeks or more. Before making such an adjustment to charges, we may require the customer or their representative to demonstrate to our reasonable satisfaction that the property is unoccupied. This may be established, for example, by the provision of a copy of the death certificate, or a letter from the customer's executors or solicitors as appropriate.

Adjustments to charges

We try to ensure that all customer bills for charges are correct, but if we find or are made aware of an error we reserve the right to correct the charges. We will always make an appropriate adjustment if correcting the error is in the customer's favour. We will not make an adjustment in our favour that relates wholly to an earlier charging year if it is clear that the error is solely due to our failure.

Water used for fire fighting purposes

No charge is made for water used for fire fighting purposes, for the testing of apparatus installed or equipment used for extinguishing fires or for the purpose of training persons for fire fighting.

Ownership of water meters

Southern Water owns and is responsible for any water meter it has installed. It is a criminal offence to damage, or tamper with, a meter or any other apparatus that belongs to us. Where a meter or other apparatus has been deliberately damaged or tampered with, the customer is liable for the repair or replacement costs incurred by us.

The switch date

We call the date that we switched you from unmetered charges to metered charges, or from unmetered charges to assessed charges if you cannot have a meter, the switch date.

If you have had a meter installed under our metering programme, the switch date will either be the date that we installed your meter, or a later date that we informed you of.

If you could not have a meter installed, the switch date would normally have been the date that our surveyor concluded that your home could not be metered under our metering programme.

Section 2: For customers with a metered water supply who are paying the Changeover Tariff

How the Changeover Tariff can assist

If your metered charges are likely to be higher than your unmetered charges, the Changeover Tariff will assist you in making the change to full metered charges.

It does this by introducing metered charges in steps over the first two years following your switch to metered charging, which gives you time to budget appropriately and review your water use. The difference between what you have paid while on the Changeover Tariff and what you would have paid on the normal metered tariff does not have to be repaid to us.

Requesting the Changeover Tariff

If your home has been metered under our metering programme, you may request that we place you on the Changeover Tariff.

Your request must be received by us within 24 months of the date on which we switched your charges from unmetered to metered.

If you move out of your home and you have not requested to be placed on the Changeover Tariff, then your closing bill will be based on our normal metered tariff (as shown in Section 8).

Start and end of the Changeover Tariff

You may choose whether to have the Changeover Tariff applied from the date you switched to metered charges, or from the start date of a later billing period within the first 24 months of metered charging.

If at the time we receive your request we have already billed you on our normal metered tariff (as shown in Section 8), we will cancel those charges in accordance with your choice of dates, and re-bill you for the same period on the Changeover Tariff.

The Changeover Tariff shall end 24 months after the date we switched you to metered charges. Charges after this date will be based on our normal metered tariff.

If at any time while you are on the Changeover Tariff you decide that you would rather be charged on our normal metered tariff, then you may request that we switch you to our normal metered tariff.

In these circumstances you may choose whether to have our normal metered tariff applied from the date you switched to the Changeover Tariff, or from the start date of a later billing period.

Where we have billed you on the Changeover Tariff, the charges will be cancelled in accordance with your choice of dates, and we will re-bill you for the same period on our normal metered tariff.

If you choose to switch from the Changeover Tariff to our normal metered tariff, you will not be able to go back onto the Changeover Tariff at a later date.

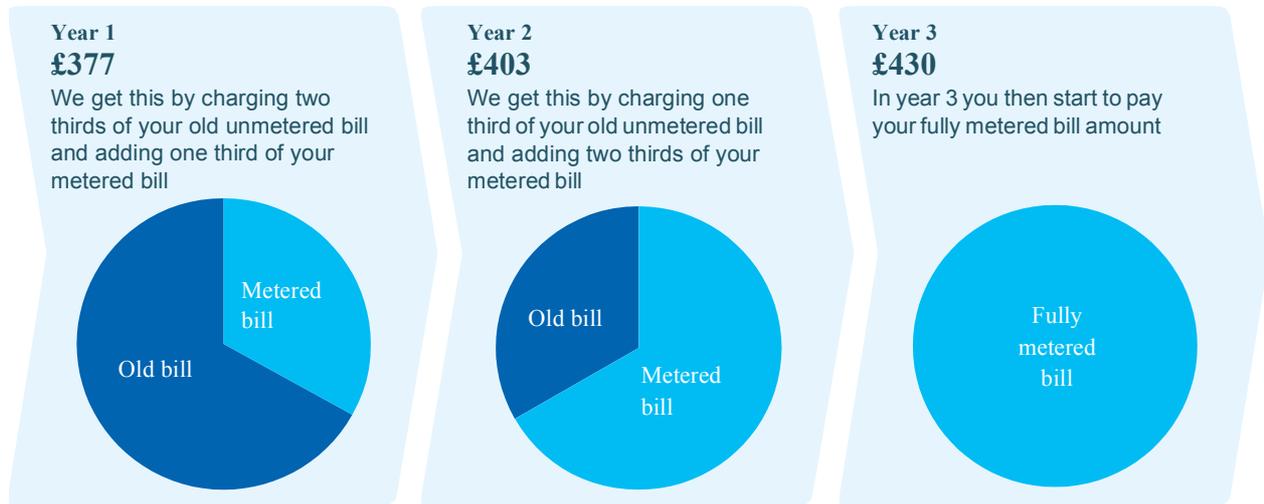

How the Changeover Tariff works

When we bill you on the Changeover Tariff, we start by making the following calculations:

1. We calculate what your metered charges would be for the billing period if you were paying our normal metered tariff (as shown in Section 8). We call this the metered element.
2. We calculate what your unmetered charges would have been for the billing period if we hadn't installed a meter under our metering programme and you were paying our normal unmetered tariff (as shown in Section 8). We call this the unmetered element.

The amount we actually bill you under the Changeover Tariff depends on how much time has gone by since we switched you to metered charges.

An example of how the Changeover Tariff would work is provided below for a customer with unmetered charges of £350 and metered charges of £430. This example is based on year 1 prices, and assumes the customer uses the same amount of water in year 1 as in year 2.

How the metered and unmetered elements are calculated

The metered element is based on our normal metered tariff and the unmetered element is based on our normal unmetered tariff. These tariffs are shown in Section 8.

(a) Metered element

The metered element consists of:

1. A standing charge for each service provided.
2. A volume charge for each service provided.

The standing charge is a fixed charge and covers the costs of maintaining your water services account.

The volume charge for the water supply service is based on the amount of water supplied to your home, and this will normally be the volume of water recorded on the meter in each billing period (normally six months). To calculate the volume charge we multiply the volume of water supplied (in cubic metres) by the metered water volume charge.

The volume charge for the sewerage service is based on 92.5% of the volume of water supplied. This is to reflect the fact that not all the water you use returns to the sewer. 92.5% is an assessment of the typical percentage return, but this will vary for all customers. To calculate the volume charge we multiply your water volume (in cubic metres) by 92.5%, then multiply the resulting assessed volume of sewage by the metered sewerage volume charge.

If you are able to provide evidence that much less than 92.5% of the water supplied regularly returns to the sewer, you may apply for an adjustment to your sewerage volume charges.

If we do agree to an adjustment, it will take effect from the date of your last account before we received your application. After this, you must tell us straight away if there is any change in your circumstances that may affect the adjustment we have agreed. Where there has been such a change in circumstances, any further adjustment to your sewerage volume charges will be made from the date of that change.

(b) Unmetered element

The unmetered element consists of:

1. A standing charge for each service provided.
2. A rateable value charge for each service provided.

The standing charge is a fixed amount for all properties and covers the costs of maintaining your water services account.

The rateable value charge is calculated on the rateable value of your home.

To calculate the rateable value charge we multiply your home's rateable value (in £s) by the rateable value charge.

If you paid assessed charges before we metered your home under our metering programme, then the unmetered element will consist of the assessed charge based on the number of bedrooms in your home, or on single occupancy if applicable.

What is rateable value?

The rateable value was used as the basis for local authority taxation prior to 1990. Rateable values were set by the Valuation Office (formerly part of the Inland Revenue, now part of HM Revenue and Customs) to reflect the rental value of the property. We normally use the rateable value quoted in the Valuation List in force on 31 March 1990.

The 1999 Water Industry Act allowed us to continue to use the rateable value for water charges even though it is no longer used for taxation.

Meter readings

You will normally receive two bills every year, approximately six months apart, based on a meter reading we have taken. If for any reason we cannot take a reading on your meter, or we believe the meter has not been recording properly, you will receive an estimated bill, but this can be adjusted later if the actual volume of water used is confirmed.

If there is a leak

If there is a leak on your supply, our Code of Practice for Domestic Customers governs how we will adjust your bill. Please contact our Customer Services Centre or go to our website if you would like to receive a copy of our Code of Practice (see Section 9 on how to contact us).

When you should pay

Once we have sent you a bill, it should be paid in full immediately. However, if you contact us, we will agree an instalment arrangement with you to pay your bill by regular weekly, fortnightly or monthly instalments. If you fail to pay an instalment on time, the arrangement will be cancelled and the remaining balance becomes payable in full immediately.

If you fail to pay your charges and your debt is referred to a debt collection agency for collection, additional charges will be added to your account with us.

The ways in which you can pay your bill, and any instalments we agree with you, are explained in Section 5.

The charges in Section 8 apply for a period of 12 months from 1 April 2019. Where the bill covers any dates outside that period, your charges will be apportioned on a daily basis and applied to the appropriate tariff in place for that period.

Section 3: For customers with an unmetered water supply who are paying the Changeover Tariff

How the Changeover Tariff can assist

If your assessed charges are likely to be higher than your unmetered charges, the Changeover Tariff will assist you in making the change to full assessed charges.

It does this by introducing assessed charges in steps over the first two years following your switch to assessed charging, which gives you time to budget appropriately. The difference between what you have paid while on the Changeover Tariff and what you would have paid on the normal assessed tariff does not have to be repaid to us.

Requesting the Changeover Tariff

If your home could not be metered under our metering programme and we switched you to our assessed charge, you may request that we place you on the Changeover Tariff.

Your request must be received by us within 24 months of the date on which we switched your charges from unmetered to assessed.

If you move out of your home and you have not requested to be placed on the Changeover Tariff, then your closing bill will be based on our normal assessed charge (as shown in Section 8).

Start and end of the Changeover Tariff

You may choose whether to have the Changeover Tariff applied from the date you switched to assessed charges, or from the start date of a later billing period within the first 24 months of assessed charging.

If at the time we receive your request we have already billed you on our normal assessed charge (as shown in Section 8), we will cancel those charges in accordance with your choice of dates, and re-bill you for the same period on the Changeover Tariff.

The Changeover Tariff shall end 24 months after the date we switched you to assessed charges. Charges after this date will be based on our normal assessed charge.

If at any time while you are on the Changeover Tariff you decide that you would rather be charged on our normal assessed charge, then you may request that we switch you to our normal assessed charge.

In these circumstances you may choose whether to have our normal assessed charge applied from the date you switched to the Changeover Tariff, or from the start date of a later billing period. Where we have billed you on the Changeover Tariff, the charges will be cancelled in accordance with your choice of dates, and we will re-bill you for the same period on our normal assessed tariff.

If you choose to switch from the Changeover Tariff to our normal assessed charge, you will not be able to go back onto the Changeover Tariff at a later date.

How the Changeover Tariff works

When we bill you on the Changeover Tariff, we start by making the following calculations:

1. We calculate what your assessed charges would be for the billing period if you were paying our normal assessed charge (as shown in Section 8). We call this the assessed metered element.
2. We calculate what your unmetered charges would have been for the billing period if we hadn't switched you to assessed charges under our metering programme and you were paying our normal unmetered tariff (as shown in Section 8). We call this the unmetered element.

The amount we actually bill you under the Changeover Tariff depends on how much time has gone by since we switched you to assessed charges.

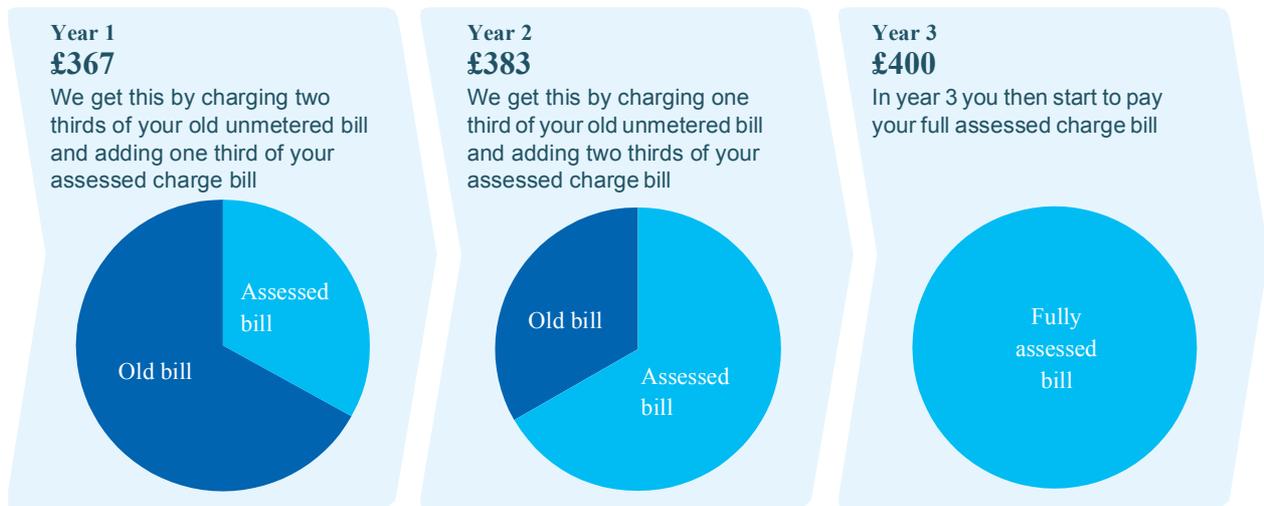

During the first year after we switch you to assessed charges, we calculate your bill by adding together:

- 33.3% of the assessed metered element (see 1.) and
- 66.7% of the unmetered element (see 2.).

During the second year after we switch you to assessed charges, we calculate your bill by adding together:

- 66.6% of the assessed metered element (see 1.) and
- 33.4% of the unmetered element (see 2.).

An example of how the Changeover Tariff would work is provided below for a customer with unmetered charges of £350 and assessed charges of £400. This example is based on year 1 prices.

How the assessed metered and unmetered elements are calculated

The assessed metered element is based on our normal assessed charge and the unmetered element is based on our normal unmetered tariff. These are shown in Section 8.

(a) Assessed Metered element

The assessed metered element consists of:

1. A standing charge for each service provided.
2. An assessed volume charge for each service provided.

The standing charge is a fixed charge and covers the costs of maintaining your water services account. The assessed volume charge for the water supply service is based on the number of bedrooms in your home, or on single occupancy (see Section 1). To calculate the assessed volume charge we multiply your assessed volume (in cubic metres) by the metered water volume charge.

The assessed volume charge for the sewerage service is based on 92.5% of the assessed volume of water supplied. This is to reflect the fact that not all the water you use returns to the sewer. 92.5% is an assessment of the typical percentage return, but this will vary for all customers. To calculate the assessed volume charge we multiply your assessed water volume (in cubic metres) by 92.5%, then multiply the resulting assessed volume of sewage by the metered sewerage volume charge.

(b) Unmetered element

The unmetered element consists of:

1. A standing charge for each service provided.
2. A rateable value charge for each service provided.

The standing charge is a fixed amount for all properties and covers the costs of maintaining your water services account.

The rateable value charge is calculated on the rateable value of your home.

To calculate the rateable value charge we multiply your home's rateable value (in £s) by the rateable value charge.

What is rateable value?

The rateable value was used as the basis for local authority taxation prior to 1990. Rateable values were set by the Valuation Office (formerly part of the Inland Revenue, now part of HM Revenue and Customs) to reflect the rental value of the property. We normally use the rateable value quoted in the Valuation List in force on 31 March 1990.

The 1999 Water Industry Act allowed us to continue to use the rateable value for water charges even though it is no longer used for taxation.

When you should pay

Charges are calculated for the whole year starting 1 April 2019 and are due and payable on that date. However, we will accept payment:

- by two instalments on 1 April and 1 October,
- if you contact us, by regular weekly, fortnightly or monthly instalments.

If you fail to pay an instalment on time, the arrangement will be cancelled and the remaining balance becomes payable in full immediately.

If you fail to pay your charges and your debt is referred to a debt collection agency for collection, additional charges will be added to your account with us.

The ways in which you can pay your bill, and any instalments we agree with you, are explained in Section 5.

If you move into a property part way through a charging year we will send you a bill for the remaining part of the year. Once we have sent you a bill it should be paid in full immediately.

The charges in Section 8 apply for a period of 12 months from 1 April 2019.

Section 4: Special help for vulnerable customers

We have two special tariffs for customers struggling to pay their water services charges: our Essentials tariff and the WaterSure tariff. These are explained in our booklet **Southern Water charges 2019-20: A guide for household customers**.

If you qualify for both of these tariffs, we will provide you with the one that gives you the most assistance with your charges. However, if you are in receipt of one of these tariffs and you have been part of our metering programme, you will not be able to receive additional assistance with your water and sewerage charges from the special metering tariffs provided under this programme.

Section 5: Paying your bill

Who is responsible for paying charges?

The person(s) living in a property is (are) responsible for paying charges for the water supply and/or sewerage services provided to them.

In certain situations we may accept someone else, such as a landlord, as responsible for paying the charges. But, you must agree this with us first.

How you can pay

- Direct Debit – Please go to our website to apply on-line or ring our 24-hour automated line on **0330 303 1263**. Alternatively we can take your details over the phone or send you a form to complete.
- Debit and credit cards – Online at southernwater.co.uk or by dialling our 24-hour automated line on **0330 303 1263**.
- PayPoint – For weekly, fortnightly or monthly instalments, cash payments can be made at any shop with a PayPoint terminal. If you don't have a payment card please take your bill with you. You can ring our 24-hour automated line on **0330 303 1263** to apply for a payment card.
- At a bank or post office – Payments can be made at most banks or post office branches using the payment slip provided on your bill. Payments may also be made at post office branches using a payment card. The service is free of charge if paid at the post office, at a branch of the NatWest Bank, or at any branch of your own bank (except Santander and Halifax).
- Home or telephone banking – Please quote your payment reference number. Our bank sort code is 40-02-50 and our bank account number is 91426907.
- By post – Please complete and tear off the payment slip provided on your bill, and send it with your cheque made payable to Southern Water to PO Box 564, Darlington, DL1 9ZG.
- Water Direct – You can also ask us to apply on your behalf to the Department for Work and Pensions for payments to be made directly from certain benefits or credits under the Water Direct scheme.

Difficulties with paying

If you are worried about paying your Southern Water bills we will do all we can to help. We will always take into account your personal circumstances and try to come to a mutually agreeable payment arrangement. More information is available on our website, or you can contact us (see Section 9).

Section 6: Use of personal information

Our full Privacy Statement is available via our website (southernwater.co.uk) or on written request. A summary is provided below.

6.1 We may use your information to do the following:

- i. Provide you with water and sewerage services (where licensed to do so in your area).
- ii. Help run, and contact you about improving the way we run any accounts, services we have provided before, now or in the future.
- iii. Create statistics, analyse customer information, create profiles (including using information about what services we supply to you and how you pay for them).
- iv. Help prevent and detect debt, fraud and loss.
- v. Help train our staff.
- vi. Contact you in any way (including by email, phone, text or multimedia message or other forms of electronic communications or by visiting you) about our services.
- vii. Provide you information on water-related goods or services that we believe may be of benefit (unless you have notified us of an objection).
- viii. Make automated decisions.

6.2 We may monitor and record any communications we have with you, including phone conversations and emails, to make sure we are providing a good quality and efficient service and meeting our regulatory and legal responsibilities.

We may allow other people and organisations to use information we hold about you:

- i. to provide services you have requested, which may include providing information to members of your family or household, anyone acting on your behalf or other people who may be interested (such as landlords or letting agents);
- ii. to help to prevent and detect debt, fraud, or loss (for example by giving this information to a credit reference agency), which is described in more detail in clauses 6.4 & 6.6 below;
- iii. if you do not pay your debt, we may transfer your debt to another organisation and give them details about you and that debt;
- iv. if we have been asked (for example by Ofwat or a lawyer) to provide information for legal or regulatory purposes;
- v. as part of current or future legal action;
- vi. as part of data-sharing initiatives, for example, those designed to assist vulnerable groups of people;
- vii. to provide you information on water-related goods or services offered by trusted third parties. (unless you have notified us of an objection);
- viii. where water and wastewater services are provided by us and another water company, in order that our and their records are kept up to date.

From time to time these other people or organisations may be outside the European Economic Area (EEA), and as a result we may use your information in countries that do not have the same standards or protection for personal information as the UK. Where such transfer occurs, we will put in place appropriate measures to safeguard the data.

6.4 If we suspect someone has committed fraud or stolen water by tampering with the meter or diverting the water supply, we will record these details on your account record and may share this information with Ofwat and other people who are interested (such as landlords, housing associations, police or other authorities). We may use this information to make decisions about you, your character, how likely we think you are able to pay for the services we provide to you. This may include recording sensitive personal information such as criminal offences you have been accused of.

6.5 In limited circumstances where you inform us, or we believe, that you (or a member of your household) need extra care (for example, because of your age, health, disability or financial circumstances), we may record this in the information we hold about you. We may share your information with social services, charities, healthcare and other support organisations, if we believe that this is warranted and that they may be able to help you.

6.6 We will check your details with one or more credit reference and fraud prevention agencies to help us make decisions about your ability to make payments and the payment arrangements which we may offer you. Below, we have given a brief guide to how we, the credit reference and fraud prevention agencies will use your information. If you would like more information about this, you can find the full version at southernwater.co.uk, or phone us on **0330 303 0277** and we will send you a leaflet.

- i. We will search at credit reference and fraud prevention agencies for information about you. If you are providing information about other people who receive our services on a joint basis, you must make sure they agree that we can use their information to do this. If you give us false or inaccurate information and we suspect fraud, we will pass your details to credit reference and fraud prevention agencies. Law enforcement agencies (such as the police and HM Revenue & Customs) may receive and use this information.
- ii. We and other organisations may also access and use information about you that credit reference and fraud prevention agencies give us to, for example:
 - a. check details on applications you make for credit and credit-related services;
 - b. check your identity;
 - c. prevent and detect fraud and money laundering;
 - d. manage credit and credit-related accounts or services;
 - e. recover debt;
 - f. check details on proposals and claims for all types of insurance; and
 - g. check details of employees and people applying for jobs with us.
- iii. When credit reference agencies receive a search from us, they will record this on your credit file.
- iv. We will send information on your account to credit reference agencies and they will record it. If you have an account with us, we will give details of it and how you manage it to credit reference agencies. If you have an account and do not repay money you owe in full or on time, credit reference agencies will record this debt. They may give this information to other organisations and fraud prevention agencies to carry out similar checks, find out where you are and deal with any money you owe. The credit reference agencies keep records for six years after your account has been closed, you have paid the debt or action has been taken against you to recover the debt.
- v. We and other organisations may access and use, from other countries, information recorded by fraud prevention agencies.
- vi. If you want to see what information credit reference and fraud prevention agencies hold about you, you can contact the following agencies currently working in the UK. They will charge you a small fee.

Callcredit

6.7 If you give us information on behalf of someone else, you confirm that they have given permission for us to use their personal information in the way we have described above and/or within our full Privacy Statement. If you give us sensitive information about yourself or other people (such as health details or details of any criminal convictions of members of your household), you agree (and confirm that the person the information is about has agreed) that we can use this information in the way set out in this document and/or our full Privacy Statement.

6.8 You are entitled to have a copy of the information we hold on you, and to have any inaccurate information corrected. We may charge you a small fee for providing a copy of any information we hold about you. For more information about this, or our use of your personal data, please contact us as follows:

Section 7: Further information

This section includes details on:

- i. Water meters
- ii. What to do if you are moving home
- iii. How to apply for a surface water drainage rebate
- iv. How to complain
- v. What happens if you enter into any formal insolvency procedure

Water meters

Our Code of Practice for Domestic Customers contains important information if you have a water meter. This includes the arrangements for, and the costs of, testing meters. To view our Code of Practice please go to our website, or we can send you a copy in the post.

When you move home

When you tell us you are moving to another property within Southern Water's area, we will tell you how charges are raised at the new address. We will also give you details of any options and alternatives for charges that may be available.

If we supply you with a metered water supply, you must give us at least two working days' notice when you move home. If you fail to do so you will continue to be responsible for metered charges at the property beyond the date you leave. In this situation your responsibility ends on the earliest of the following dates:

- (a) 28 days after you tell us of your move,
- (b) the next routine meter reading date, or
- (c) the day on which details of the new occupier are notified to us.

If you are a landlord, please use the water industry's tenant address portal (www.landlordtap.com) to register details of new tenancies and those liable for water services charges at your properties.

Southern Water's area of operation

Surface water drainage rebate

Our full sewerage standing charge includes a fixed charge, currently £25.90, for surface water drainage.

If surface water (for example, rainwater run-off from roofs, paths and patios) does not drain from your property into the sewerage system, then you are entitled to a rebate.

To request a rebate you must call our 24-hour message line at **0330 303 1266** or complete and submit our online form. If we agree that a rebate is payable it will be backdated to 1 April 2015, or the date on which you became the occupier of the property if this is later.

Please note that we do not operate a system of partial rebates where only some surface water drains from your property into the sewerage system. This is because we think that the costs of operating such a scheme would be greater than the benefits that would arise.

Please also note that we do not provide a reduction in surface water drainage charges to community groups.

Complaints

If you are unhappy about the way we have calculated your charges we have an established complaints procedure. If you remain dissatisfied with our response, you can refer the matter to the Consumer Council for Water London & South East (CCWater), who are an independent customer body set up by government.

Some types of complaint can be referred to an independent arbitrator. Further details can be found in our Code Of Practice for Domestic Customers.

We have a leaflet entitled 'Our Complaints Procedure' which explains our complaints procedure in full. To view this and our Code of Practice, please go to our website or we can send you a copy in the post. The contact details for CCWater are provided in the 'Contact Us' section at the end of this booklet.

If you enter into any formal insolvency procedure

If you enter into any formal insolvency procedure (including liquidation, administration, receivership, bankruptcy, company or individual voluntary arrangement or equivalent procedure), any charges for the current charging year that are to be included in the procedure will be calculated on a daily basis to the date of the procedure. We call this date 'the insolvency date'. The procedure will not include any charges for the remainder of the financial year after the insolvency date.

Section 8: Our charges for 2019–20

Normal unmetered tariff - water	
Standing charge	£18.58
Rateable value charge (per £ rateable value)	£0.862
