

# Rivers & Seas Watch

from Southern Water

Version No. R&SW 1.4.2 Type:

Minor release Release Date:

26.03.2026

[Download beta release notes  
\(1.0.0 - 1.0.5\)](#)

## Release description

This update provides the addition of an 'In progress' status for storm overflow reduction projects and small copy updates to other statuses on the Investment Plans map.

## What's new?

- **Easier to see what's happening in your area:** We've added a new 'In Progress' status to the investment plans map. Now you can quickly see where work has already started thanks to a new pin colour and clearer labels.
- **Ability to filter by work in progress:** The filter has been updated to reflect the new status so you're able to filter the view by work already started.

## Minor defect fixed

An error with the 'Last Update' text at the bottom of the window meant it did not reflect the last time the underlying data had been updated. This has been fixed with the correct date and 'Data last updated' has been added for clarity.
