

Edible Rafts

Please ensure you wash your hands before touching the food.

You will need –

- Breadsticks
- Strawberry Laces
- Chocolate mini bar, i.e. Milky Way or similar
- Washing up bowl, paddling pool, sink or bath (for testing)

Take 4 breadsticks and make a square with them, resting two on top of the others. Make sure there is enough overlap at the ends so they can be tied together. Use the Strawberry Laces to tie the ends of the breadsticks.

Fill the washing up bowl, paddling pool, sink or bath with water. Take a mini chocolate bar or similar and carefully place it on top of the raft in the water. Time it to see if the chocolate bar stays afloat and secure on the raft for at least 30 seconds.

If not, try building a new raft.

Why not use more breadsticks and laces to create a larger raft?

You could also add a sail using a sheet of toilet paper and a breadstick or cocktail stick. If testing using a bigger water container, i.e. paddling pool or the bath, you could have a raft race.

Wash your hands when finished!
