## **SOUTHERN WATER SERVICES LIMITED**

### **TEST SURFACE WATER DROUGHT PERMIT**

#### **SECTIONS 79A OF THE WATER RESOURCES ACT 1991**

Southern Water Services Limited ("Southern Water") HEREBY GIVES NOTICE that due to the threat of a serious deficiency of water supplies in the Hampshire and Isle of Wight water supply areas, that will result should the River Test flow recede to the level limiting abstraction within its abstraction licence, Southern Water of Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX, is applying to the Environment Agency for a Drought Permit under Section 79A of the Water Resources Act 1991 (as amended by the Environment Act 1995).

Southern Water is licensed to abstract water from the River Test (licence number 11/42/18.16/546, as amended on 15 March 2019 ("the Licence"). Under the terms of the Licence, Southern Water is allowed to abstract a maximum quantity of 29,200 Megalitres per year, 80 Megalitres per day or 3.5 Megalitres per hour, subject to the Total Test Flow ("TTF") remaining above the Hands-off Flow ("HoF") of 355 Megalitres per day.

The proposed drought permit will involve an amendment to the Licence to reduce the HoF condition from a TTF of 355 Megalitres per day to 265 Megalitres per day. The proposed Drought Permit, if granted, will allow Southern Water to continue to abstract water to the lower HoF in the River Test. This water is necessary to secure the supplies of water made available to the public and to commercial users.

Southern Water will show that the threat of a deficiency of water supply relates to an "exceptional shortage of rainfall" within its drought permit application.

The Environment Assessment Report has indicated that potential ecological impacts on the River Test SSSI are uncertain. A monitoring and mitigation programme has been agreed with the Environment Agency and Natural England, with advice from the Hampshire & Isle of Wight Wildlife Trust to mitigate this uncertainty.
