

Class water-saving daily dares

What to do

1. Suggest changes that your class could make to use less water.
2. Fill in the table to estimate how much water each change would save – use the water use chart below to help.
3. As a class, agree on five water-saving changes that you will make as daily dares for a week.
Write these on the wall tracker.

Area to save water	Change to make	Estimate amount saved
Example: Bathroom	Turn tap off when brushing teeth for 2 minutes	12 litres - 1 litre = 11 litres Tap running for 2 minutes = 12 litres Turn on tap only when needed = 1 litre Saving... 12 - 1 = 11 litres

Action	Amount of water used
Brushing teeth with tap running	6 litres
Brushing teeth with tap off	0.5 litres
Flushing toilet	6 litres each flush
Taking a four-minute shower	32 litres
Bath	80 litres
Dishwasher	14 litres
Washing machine	50 litres
Use the hosepipe	150 litres for 10 minutes
Bucket of water and sponge	10 litres
Watering can	4 litres

Class water-saving daily dares tracker

Track the daily water-saving dares that you have completed on your journey to becoming a Water Hero. Colour the boxes blue as you complete the dare.

Will you become a Water Hero?

Name	Water-saving daily dare					Estimate how much water you have saved
	Monday	Tuesday	Wednesday	Thursday	Friday	
	Turn off the tap when brushing your teeth	Now you choose dares!
