

What do you know about water?

Work with a partner to decide whether each of the statements is true or false

1. Most of the water on planet earth is fresh water that can be used for drinking.
2. The water on earth is over four billion years old and was formed when our planet was formed. We are drinking the same water that dinosaurs drank.
3. Water can exist in three different states: as a solid, a liquid or a gas.
4. Water freezes at 100°C.
5. On average, a person in the UK uses 150 litres of water each day.
6. One in 10 people in the world do not have safe water for drinking.
7. A bath uses less water than a four-minute shower.
8. It is OK to flush any rubbish down the toilet.
9. More people in the world have a mobile phone than a toilet.
10. Humans can survive for weeks without food, but cannot survive without water.
