## The Green, Southwick Infiltration Plan

Appendix A – Status of Planned Actions - August 2025

## Summary of work completed

| Action                         | Km of sewer |
|--------------------------------|-------------|
| Length Surveyed by CCTV        | 2.47        |
| Length Surveyed by Electroscan | 0.0         |
| Length with no work required   | 1.79        |
| Length Sealed                  | 0.68        |
| Length to be sealed            | 0.52        |
| Manholes sealed                | 5           |
| Manholes to be sealed          | 1           |

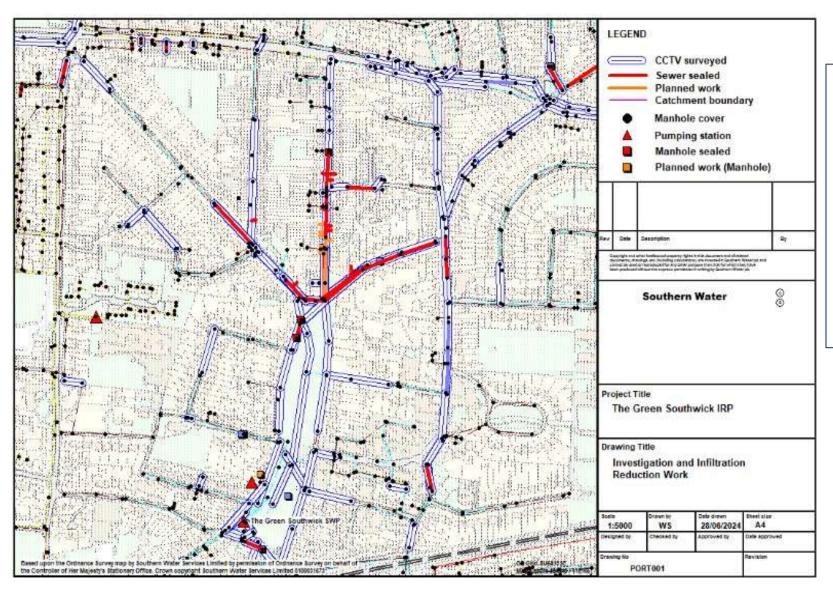

| Reporting Year | Surveyed<br>(km) | Sewers Sealed<br>(km) | Manholes<br>Sealed |
|----------------|------------------|-----------------------|--------------------|
| 2014           | 0.93             | 0                     | 0                  |
| 2015           | 1.45             | 0.3                   | 5                  |
| 2016           | 0                | 0.08                  | 0                  |
| 2017           | 0                | 0                     | 0                  |
| 2018           | 0.09             | 0                     | 0                  |
| 2019           | 0                | 0.21                  | 0                  |
| 2020           | 0                | 0                     | 0                  |
| 2021           | 0                | 0                     | 0                  |
| 2022           | 0                | 0                     | 0                  |
| 2023           | 0                | 0                     | 0                  |
| 2024           | 0                | 0.09                  | 0                  |
| 2025           | 0                | 0                     | 0                  |
| Total          | 2.47             | 0.68                  | 5                  |

## Reference Plan

## Detailed plan 1

Note – sewers shown as surveyed by cctv or Electroscan (green line) with no corresponding sealing work have been determined to not require rehabilitation.

The use of storm harvester data will be used at some point in the future to target inspections and find infiltration
