Appendix B

APPENDIX B

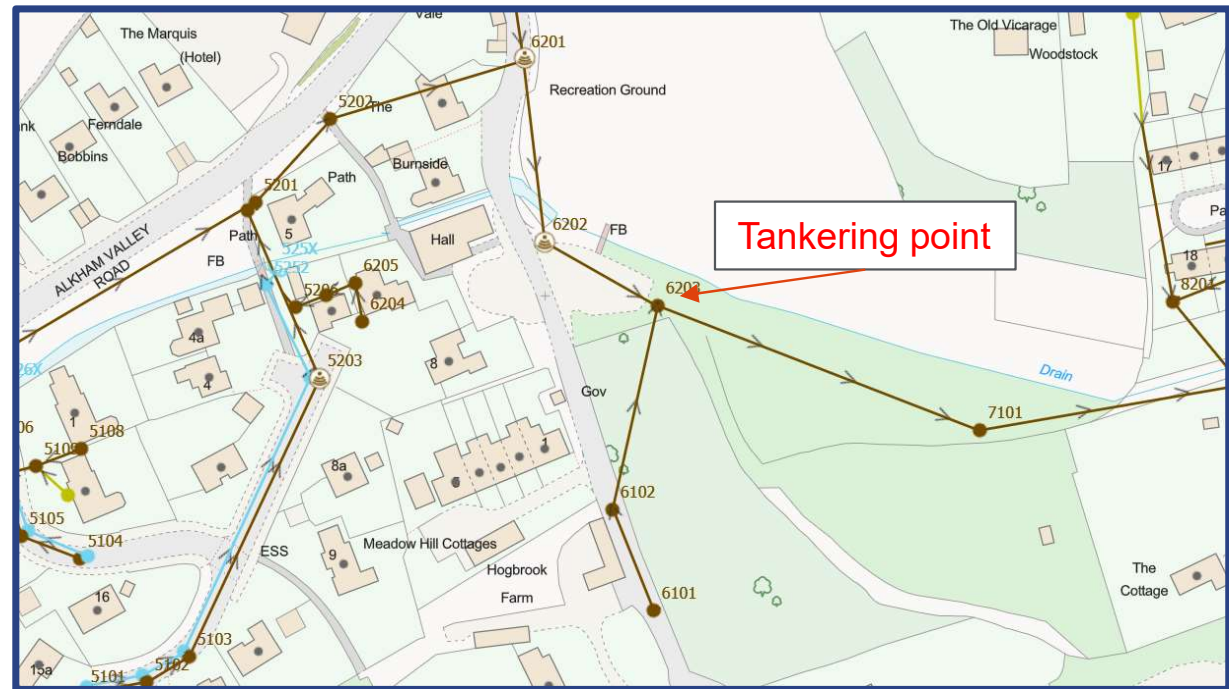

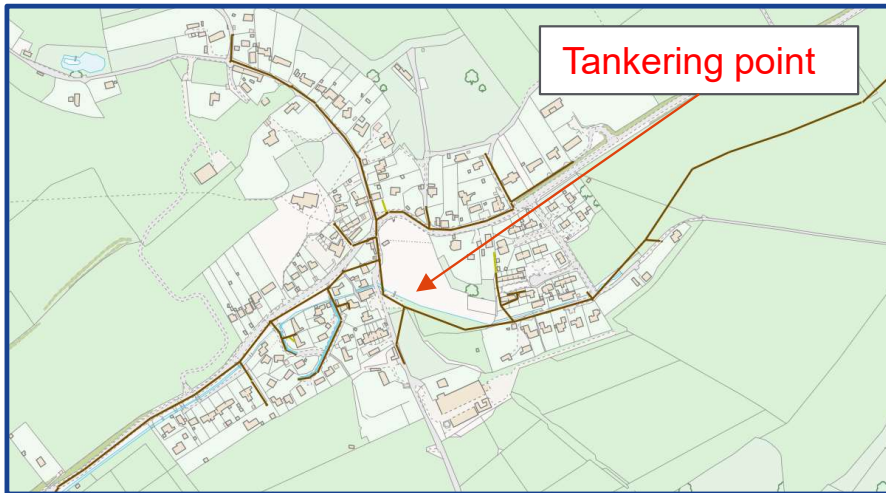

Mitigation measures

See notes in Section 4 regarding the potential need to introduce mitigation measures to reduce the risk of groundwater infiltration impacting the level of service provided by the sewerage system. Location of sites will be selected to provide the most effective arrangements to maintain services, whilst minimising environmental effects. Where practical, sites that have been used previously are expected to be re-used (when necessary), but the use of different locations cannot be ruled out, if hydraulic conditions dictate.

Tanker Location

Alkham Village — tankers will be deployed to the location below

Tankered liquid is to be disposed of at Elizabeth Street Dover WPS, or alternatively Weatherlees Hill A WTW.
