Appendix B

APPENDIX B

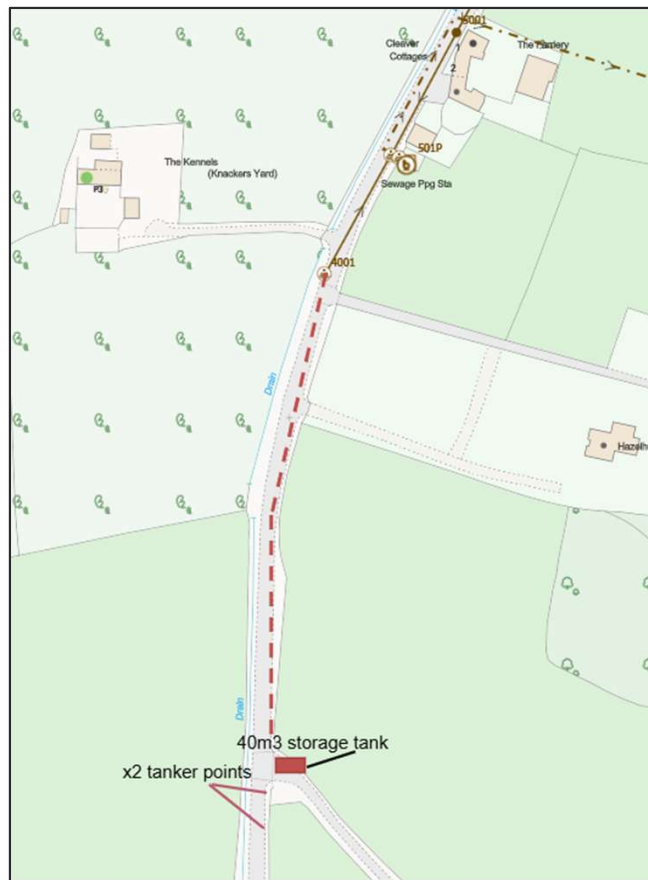

Mitigation measures

See notes in Section 4 regarding the potential need to introduce mitigation measures to reduce the risk of groundwater infiltration impacting the level of service provided by the sewerage system. Location of sites will be selected to provide the most effective arrangements to maintain services, whilst minimising environmental effects. Where practical, sites that have been used previously are expected to be re-used (when necessary), but the use of different locations cannot be ruled out, if hydraulic conditions dictate.

Tanker Locations

Appleshaw – Cleaver Cottages wastewater pumping station – tankers will be deployed to the location: (W3W///older.sculpture.bleaching)

Tankers will dispose of loads at Fullerton WTW

Penton Mewsey — Harroway Lane wastewater pumping station —
tankers will be deployed to the location below
(W3W///strutting.history.outbound)

Tankers will dispose of
loads at Fullerton WTW

Weyhill — Weyhill Bottom wastewater pumping station — tankers will be deployed to the location below ([W3W///tigers.moving.numeral](#))

Tankers will dispose of loads at Fullerton WTW
