

Pathfinder IoW – Fishbourne and Wootton

Key

-  **Slow the Flow**
The installation of water butts or planters to catch the rain, and release it slowly back to the environment or the existing drainage system.
-  **Optimisation**
The installation of solutions that will maximise the existing installed infrastructure.
-  **Surface water connections**
Reviewing the catchment to identify and relocate surface water connections into the foul system and relocate to an appropriate location, surface water course or system.

All schemes will be complete in 2024
